

IBM CLOUD RE SOURCES

The screenshot shows the IBM Watson Studio interface. The top navigation bar includes the IBM Watson Studio logo, a search bar, and user account information. The main content area is divided into tabs: Overview, Assets (selected), Jobs, and Manage. The Assets tab displays a list of 6 assets. On the left, there is a sidebar with 'Asset types' showing 'Data' (5 items) and 'Notebooks' (1 item). The main list of assets includes:

Name	Last modified
Digital_Naturalist_Model Notebook	20 hours ago Modified by you
DigitalNaturalist.json.zip application/x-zip-compressed	21 hours ago Modified by you
model_weights.zip application/x-zip-compressed	22 hours ago Modified by you
DigitalNaturalist.json JSON	22 hours ago Modified by you
model.h5 application/octet-stream	22 hours ago Modified by you
Digital Naturalist Dataset.zip application/x-zip-compressed	23 hours ago Modified by you

At the bottom of the assets list, it shows 'Items per page: 20' and '1-6 of 6 items'. On the right side, there is a 'Data in this project' section with a placeholder for dropping data files.

The screenshot shows the IBM Cloud IAM (Identity and Access Management) overview page. The top navigation bar includes the IBM Cloud logo, a search bar, and user account information. The main content area is divided into sections: IAM (selected), Users, Trusted profiles, Service IDs, API keys, Identity providers, Manage access, Access groups, Authorizations, Roles, Gain insight, Inactive identities, and Inactive policies. The IAM section displays a large circular progress indicator and a summary of 'Total users' (1) and 'Active' users (1). On the right, there is a section for 'Access groups' showing '-- / 500' and 'Policies and rules' showing '8 / 4020'. A tip suggests minimizing the total number of policies by using access groups. Below the main summary, there are three sections: 'My user details' (showing user information for Vijaya raghavan V), 'My IBM Cloud API keys' (showing a recently updated key), and 'Do more with IAM' (providing links to setting up access groups and next options).
